

# AMC WATER TREATMENT™

## TREATING CHEMICALS

### Description

AMC WATER TREATMENT™ is a mixture of different specialized products to treat water used in the preparation of drilling fluids. This mixture has been developed to increase the pH to the desired alkaline level and at the same time efficiently remove both the hardness and other cations that may interfere with the preparation of the drilling fluid.

### Application

AMC WATER TREATMENT™ should always be added to make up water prior to the addition of polymers or bentonite when the make up water quality is known to be poor.

### Typical Physical Properties

**Appearance:** White to off white powder

**Solubility in water:** Soluble

### Recommended Treatment

0.5 - 4kg/m<sup>3</sup> depending on the quality of the water.

*Please Note: Several factors will dictate the most appropriate concentration rate. Please contact your nearest AMC representative for optimum results.*

### Advantages

- Easy to use
- Economical.
